# INBETWEEN DTP CLIENT

Create your publication **combining creativity with speed**

As an InDesign plugin InBetween DTP-Client is the flexible solution for semi-automated creation of publications containing creative content and content automated from your Akeneo PIM.

Using InBetween DTP Client you can supplement your editorial content with content created automatically from your data. Even when your data are updated shortly before printing, our solution takes care of refreshing your publication – and the design still fits.

Benefit from all degrees of freedom that InDesign has to offer.
